

Tubular Specialist (Inspection)

Job Summary:

The Tubular Specialist is responsible for providing technical expertise in the inspection of tubular goods, including drilling pipe, casing, and tubing. This includes performing visual and dimensional inspections, as well as non-destructive testing (NDT) inspections. The Tubular Specialist is also responsible for maintaining and calibrating inspection equipment, as well as ensuring compliance with all relevant safety and quality standards.

Key Responsibilities:

- Provide technical expertise in the inspection of tubular goods, including drilling pipe, casing, and tubing
- Perform visual and dimensional inspections, as well as non-destructive testing (NDT) inspections, such as ultrasonic, eddy current, and radiographic testing
- Maintain and calibrate inspection equipment, as needed
- Ensure compliance with all relevant safety and quality standards, including API standards
- Collaborate with other departments to ensure that customer needs are met
- Continuously improve and optimize inspection processes and procedures
- Attend training and certification programs to stay current on industry trends and developments
- Train and mentor junior team members
- Provide technical support to other departments and customers as needed
- Monitor and analyze inspection data to identify areas for improvement
- Keep accurate records of inspection jobs and equipment maintenance
- Prepare inspection reports and provide recommendations for acceptance or rejection of tubular goods

Qualifications:

- Minimum of 2 years of experience in the inspection of tubular goods, including drilling pipe, casing, and tubing
- Proven experience performing visual and dimensional inspections, as well as non-destructive testing (NDT) inspections
- Strong understanding of inspection processes and techniques
- Strong mechanical aptitude and ability to maintain and calibrate inspection equipment
- Strong attention to detail and ability to identify and troubleshoot issues
- Familiarity with industry regulations and compliance, such as API standards
- Must be willing to attend training and certification programs in safety and equipment operation
- Strong organizational and time management skills
- Strong communication skills, both written and verbal.
